

# WELCOME TO TEAM CHARLIE

Charlie  
works.

As you are now part of our team, we would like to make sure that your first days will run smoothly. And if you are coming from abroad, we want to help you get settled! Therefore, we developed a small course called Onboarding.

From introducing you to our company and the Charlie team, to explaining the different roles within the organization and some basic knowledge about the sector.

We try to give you as much information to make sure you start your journey with us comfortably.

The course is developed to make you feel welcome and to put you at ease for your first exciting weeks at Charlie works. No exam, just an opportunity to get to know us.

Next to that, it will be easier to get trained the first period at work, as you will already be aware of some key information.

We understand that it can be difficult to change your routine and start a new adventure at a new company. We want to support you as much as you need.

With this small course, you will know where to find us all!
